

Emerging Systems wins award at eHealthcare Leadership Awards in New Orleans for Website Design

Sydney 10th November 2013

Emerging Systems, an Australian leader in Clinical Information Systems, Electronic Medical Records and Systems Integration were advised they were a winner in the eHealthcare 2013 Leadership Awards which were announced in New Orleans on 6th November 2013 as part of the Seventeenth Annual Healthcare Internet Conference held in New Orleans.

Winners were recognised on November 6, 2013 during a special presentation by Mark Gothberg, editor of eHealthcare Strategy & Trends, a leading Internet publication.

“We are delighted to be honoured in the Website Design section of the Awards and especially as one of the very few companies based outside the United States” said Mr Russel Duncan – CEO of Emerging Systems.

“These awards reflect Emerging Systems effort in providing our various audiences with a resource to access preliminary information about our products and services which is easily accessible and provides information using the latest infographic technology to explain complex clinical information system information in an easily digestible format as well as serving up product information in a unique manner. More importantly, it demonstrates our ongoing passion for improving patient outcomes using innovative healthcare IT. This focus is proving a successful formula for Emerging Systems and, more importantly, for our client’s” states Mr Duncan.
